

# Shropshire Astronomical Society

All our events can be found in our calendar on the home page, or on our Facebook page:

[Facebook events page](#)

We are on Twitter and Instagram, so you can catch up with us here:

[Instagram](#)

We appreciate that not everyone has a social media account. We use them because they are the quickest way for us to publicise our events and make any last-minute changes to the details. We also put all our events and their details in our calendar which is on the home page. Society members receive a newsletter which details all our events, so one way or another we do our best to keep you informed. Please do not contact us on the day of an event to ask about the event because the chances are, we won't be able to respond to you in time.

## Weather

Our events are very rarely cancelled and for our observing events, we turn up whatever the weather, just in case someone arrives needing help. If we advertise an observing session, we are dependant on the weather so please bear this in mind before making your plans to join us. You will need to wrap up warm whatever the season. Unfortunately, we don't have any more information on what the weather will be like than you do. We tend to just look outside. When the weather does disappoint, we might not stay as long as advertised, but unless we have announced otherwise, we will be there.

## Entry Fee's

Our observing sessions are free to members. Our public lectures are free entry to everyone. Where we state there is an entry fee to our events, it is because we have to cover costs and volunteer expenses so you will have to pay even if you are a Society member. When we attend someone else's event and they sell tickets you will also have to pay if you are a Society member as this is not in our control.

## Your event

If you are organising an event and would like us to attend, please feel free to get in touch via social media or the email addresses on the contacts page. Include as many details as possible and your preferred contact method and we'll get back to you.
